

The Green Street Manifesto

We are working towards making our business and our high street more sustainable and planet friendly, together with other Newcastle businesses.

We are reducing our energy consumption by using more energy efficient equipment, changing our behaviours and monitoring our energy usage.

We are taking steps to prevent, recycle and reuse as much of our waste as possible.

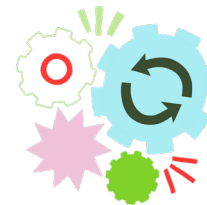

We will inspire and make it easier for our customers and our team to make sustainable changes and become more planet friendly.

We are reducing the amount of packaging we use and pass on to our customers.

We are eliminating as much single use plastic as possible from our business.

We are actively exploring stocking locally sourced and more sustainable products and services for our customers.

We are sharing our learnings and collaborating closely with our suppliers for a greener supply chain.
